FALL 2020

**Course**

BTRY 6010 LAB 405

**Instructor**

/Hochstedler, Kim

**What have you liked best about the course so far?**

She is very open to questions and also to schedule meeting to solve questions about the class.

That every lab she sums up lectures and always makes us understand the problem, instead of going directly to R.

She cares about us learning and is always willing to help

This lab section has really helped me understand the concepts of this course

Good organization and material taught.

The instructor is well-prepared.

Kim is a wonderful TA and she is rather detailed and slow-paced about her session.

**What have you liked least about the course so far?**

It is very challenging and it is great to watch it online because we can watch it over and over until we understand.

sometimes I feel lost

N/A

Homework assignments are pretty time consuming.

In the limited discussion time, the problem set could not be finished.

N/A

**In the time remaining, is there anything about the course that could be improved?**

sometimes the HWs are not release on time (the solutions) so we make mistakes that can be corrected if we have the solutions or the corrections earlier.

N/A

Go through problem set more efficiently.

**Instructor-Designed Questions**

(response of 0 means no answer)

Average

Standard Dev.

**Instructor-Designed Open-Ended Questions**

**Student Comments**

I think Kim is very comprehensive and a great instructor, she is always worried that everyone understands each lab. You can contact her and she always responds quickly.

---

Kim is an excellent TA. She is clearly a gifted teacher and would be an amazing professor. She teaches the material much more clearly than the actual lecture. We really rely on her to understand the material each week. It is clear she prepares carefully for each lab and dedicates attention to pedagogy which makes me feel comfortable asking questions.

---

Kim is truly one of the best TAs I have ever had. I really don't think I would be doing as well in the course without her.
